We've made it possible for you to expand your offerings further to fully utilize your investment.

Ask about ComfortSpa™, our base model that offers all the features and comforts of VersaSpa™ in a single treatment system, yet at an entry level price.

Introducing

ersaSpa™ age-defying sunless tanning and MORE

Imagine...One system fulfilling diverse needs that are desirable and always in season... Where spa-like treatments spur heightened experiences... Where flawless quality and comfort meet. **Imagine...**One system that evokes the skin's youthfulness – soft, smooth, supple, where skin is quickly fortified and moisturized, bronzed, hydrated, beautiful.

Imagine... Wonder... Believe...

MagicTan™ introduces VersaSpa™ the world's first **Patent-Pending** HVLP automatic skin treatment spa, that combines healthy skin therapies with state-of-the-art comfort technologies, offering you **MORE** value per square foot and your clientele **MORE** comfort and choices than ever before.

With an open design, no lingering mist and built-in blow dryer, customers can now feel Relaxed, Comfortable, Warm & Dry before, during, and after their MagicTan™ Experience.

Great results – quietly

MagicTan™ sets new standards as the first to present automated high volume, low pressure or (HVLP) turbine technology. A highly efficient air delivery process that moves air at an accelerated speed through our proprietary mist nozzles. This advantage allows clients to enjoy:

- Greater, more efficient, coverage
- Absorption without lingering mist
- Deeper, longer lasting results

Unlike other automatic booths which rely on an air compressor, the VersaSpa's™ HVLP turbine is stored inside the spray column. This saves valuable space in your Salon, while also eliminating excess noise.

the experience matters

Healthy options – quickly

Far beyond the ordinary, VersaSpa™ conveniently conceals up to three distinct health and beauty skin care solutions from one of the most advanced sunless skincare lines developed. Each pre-filled solution reservoir snaps in and out of place quickly and effortlessly making this a truly unique, value packed, fully-automated cosmetic spa. Now clients can tailor their needs and mix and match a variety of healthy skin applications.

- **PRE-SUNLESS HYDRATION SPRAY** — This Aloe Vera based skin conditioning, Ph-balanced formula super-hydrates skin cells and neutralizes surface oils - improving the overall evenness of the sunless application.
- **WORLD-RENOWNED SKIN BRONZING SOLUTION** — This authentic solution combines a proprietary ratio of DHA and Erythrulose for an unmatched cosmetic skin bronzing performance. This unique combination ensures natural-looking, rich golden color and longer-lasting results.
- **ANTI-AGING MOISTURIZER** — A multi-use rejuvenating skin therapy that evokes the youthfulness of skin, and is also ideal for both UV and sunless clientele.
- **UV SKIN DEFINING MAXIMIZER** — This revolutionary spray complex utilizes a proprietary hydrating blend of performance-driven ingredients with skin firming and anti-aging elements. The Maximizer uses the most potent blend of Tyrosine available.

Quality results – comfortably

EZ-2Breathe™

A first ever feature, to produce a fresh, comfortable atmosphere by incorporating a built-in air purification column, that draws any impure air away from the environment and into the column. It then passes through a lifetime filter that is automatically cleansed after each application session, leaving the interior clean and easy to breathe.

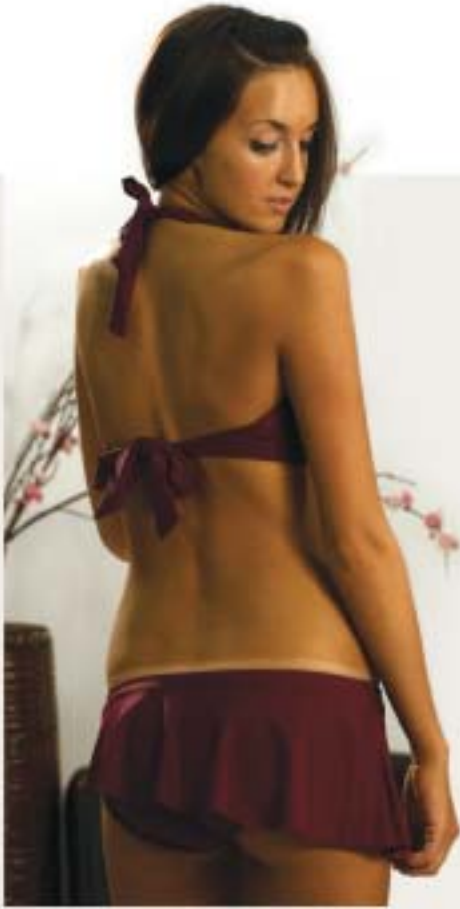

State-of-the-Art Comfort Technologies

Comfort-Dry™

Another innovative feature that leaves your client dry after every treatment by blowing soft and refreshing air gently up and down the treated area, securing each application into place. This exclusive feature prepares the skin for a dry comfortable exit, or for an additional health and beauty skin treatment application, ultimately offering customers both a comfortable and confident feeling when exiting their session.

Flexible options – conveniently

intelliSENSE™

This valuable feature offers clients the choice to mist:

- Full body
- Face only
- Legs only

Simply use the LCD keypad to enter their height along with their desired skin treatment options. intelliSENSE™ does the rest, automatically adjusting the spray nozzles to apply just the right amount of beauty solution to the chosen area. You and your clientele are ensured an overall, flawless, and even application.

more options, more value

The Perfect Union – Quality meets Comfort

VersaSpa™ provides an all-encompassing, luxurious variety of skin care options that will leave your customers feeling comfortable, warm and dry, before, during AND after their experience, with world-renowned beautiful and healthy, natural-looking, long-lasting results to ensure that they'll keep coming back for more.
